

PARI-MUTUEL BETTING WITH BONUS FEATURE

ABSTRACT OF THE DISCLOSURE

5 The intention is to provide a variety of bonusing products that function
through a bonusing system network intended to recognize and automatically
reward players participating in pari-mutuel and wagering in all forms including
wagers made at tracks, through tote systems' wagering terminals, Internet,
telephone and other electronic means with the ability to track and reward players
based on the wagering activity. Contemporaneous with issuance of a betting
10 ticket, or after the results of the race are posted, an award of a bonus can be made
in association with the players betting activity. The network also has the
capability of connecting electronic gaming machines (EGM). The bonusing
network includes functional interfaces to point-of-sale systems (including food &
beverage, event ticketing and other retail outlets) and hotel management systems.
